A Coq proof of the correctness of X25519 in TweetNaCl

Dubrovnik

34TH IEEE COMPUTER SECURITY FOUNDATIONS SYMPOSIUM

Jun. 2021

- We formally prove that the C implementation of the X25519 key-exchange protocol in the TweetNaCl library correctly implements the protocol from Bernstein's 2006 paper, as standardized in RFC 7748, as well as the absence of undefined behavior. We also formally prove that X25519 is mathematically correct, i.e., that it correctly computes scalar multiplication on the elliptic curve Curve25519. The proofs are all computer-verified using Coq.

Assembly or Optimized C for Lightweight Cryptography on RISC-V?

Vienna

CRYPTOLOGY AND NETWORK SECURITY

Dec. 2020

- In this work, we studied the general impact of optimizing symmetric-key algorithms in assembly and in plain C on RISC-V architectures. Additionally, we present optimized implementations of NIST's lightweight candidates, with speed-ups of up to 81% over available implementations, and discuss general implementation strategies.
